

- Partnered with international conglomerate on premier property
- Outstanding scientific, exploration and management teams
- Strong cash balance to support our projects through the coming years

Premier Properties

MAN Property, Alaska

- Partnered with ITOCHU Corporation of Japan
 - ITOCHU can earn up to 75% interest by spending US\$40 million on exploration
 - Pure Nickel remains operator and earns a 10% management fee
- US \$7.5 million budget for Summer 2010
- Widespread high grade nickel-copper-platinum group elements found in outcrop samples with up to **15.4% Ni, 7.19% Cu, 170 g/t PGE +Au+Ag.**
- Excellent infrastructure, property is readily accessible from two major highways and is bordered by the Alaskan pipeline. Located 265 km southeast of Fairbanks.

“We are delighted with the progress of the MAN property, our extensive dealings with the Pure Nickel team has confirmed our confidence in their technical and project management skills.

—Mr. Satoshi Kondo, ITOCHU Group manager

William Lake, Manitoba

- Located in the Thompson Nickel Belt (TNB), one of the richest nickel belts in the world which hosts a number of nickel sulphide deposits.
- 43-101 technical report completed by Scott Wilson (RPA).
- 2008 drill program resulted in the discovery of a significant new mineralized zone with nickel mineralization comparable to the styles of mineralization and stratigraphic thickness typical to the TNB.
- Assay results from 2008 drilling include 12.15 m of 0.91% Ni, 171.8 m of 0.45% Ni.
- During Winter 2010, a ground time domain EM (electromagnetic) survey was completed

“The Pure Nickel discovery is the first find of ore-grade and near ore -grade Ni-enriched intersections of sulphide iron formation in the southern extension of the Thompson Nickel Belt”

—Dr. Larry Hulbert, Chief Consulting Geologist

Pure Nickel is a mineral exploration company with a diverse collection of advanced multiple nickel sulphide and PGE projects in Canada and Alaska including William Lake and MAN Alaska

Manibridge, Manitoba Property

- Joint venture agreement with Crowflight Minerals Inc.
- Manibridge is a past producing mine that was operated between 1971 and 1977.
- 2008 drill program resulted in the discovery of two nickel zones located within 400 m of past producing mine.
- Assays include 16.75m of 1.38% Ni, 5.45m of 1.18% Ni, and 6.3m of 1.37% Ni.

HPM/Forgues, Quebec Property

- Joint Venture with Manicouagan Minerals Inc.
- Drilling continues to return significant Nickel-Copper-Cobalt assays.
- Assays include 43.18 m of 1.74% Ni including 15.5m of 2.34% and 15 m of 1.72% Ni including 1.5 m of 2.20% Ni.

Raglan (SR1 and Nuvilik), Quebec Properties

- SR1 VTEM survey completed in 2008, ground mapping & prospecting field program in 2009

Salt Chuck, Alaska

- Located on Prince of Wales Island, Alaska, excellent infrastructure.
- Near historic past producing mine with a reported production of 296,000 tons of ore grading 0.95% Cu, 2.0g/t PD, 1.1 g/t Au and 5.7 g/t Ag.
- During its era of production it was the largest producer of palladium in the US.

Fond du Lac, Saskatchewan

- Large project area in Northern Saskatchewan.
- Historical mineral resource of 3,400,000 tons of 0.66% Ni and 0.60% Cu at the Axis Lake East Zone deposit alone (non NI 43-101 code compliant).
- Previously unrecognized setting for world-class nickel camp.
- ZTEM test survey completed by Geotech Spring 2009, indicated the presence of Ni-Cu mineralized conductive horizons at Axis and Rae Lake.

Directors:

R. David Russell , Chairman
CEO, Apollo Gold Corporation

David McPherson
President & CEO

Robert Angrisano,
Former President of Nevada Star Resource Corp.
